My name is Beau Ramey I'm on the zoning commision board for Madison Township Pickaway County. We had a meeting on November 20th about rezoning land for the Andruil project. I was one of the members that voted no. I wish I would have done some research before the meeting but life gets in the way. Since the meeting I have done some research on my own and have talked to some people. I wish I could go back and change my no vote to a yes vote. I believe Andruil will be a huge asset to the community. They have already assisted in the local fire department in purchasing equipment that take a burden off the tax papers that will benefit the residents of Madison Township and the other township they protect. They have needed that equipment for a while and it wasn't feasible before. Andruil has also been to Teays Valley educating the kids and our future on what Andruil does and will be making and have encouraged the students at Teays Valley and the students in the county to apply for a job once they get out of school which myself never had that opportunity. I think that is great opportunity for the students and a great asset to the community.

During the last zoning meeting I heard concerns about what Andruil will be making. They are going to be making drones that will serve our military. From the outside it sounds bad, but I myself and I hope people can see through the cloud that these drones are going to be a big asset to the military instead of sending brave men and women to scout, or to fight a battle we can first send a drone and help keep our military personal at a safe distance. Also the the military has to be evolving to keep us safe because there are bad people with bad intentions. It wasn't that long ago that COVID was around and shut down a lot of goods. To me it raised questions why are we so dependent on other countries for goods? I think having Andruil will help eleviate that concern especially with the military.

With that being said I fully support Andruil being here and will be proud to say Andruil is in my community.

Thanks for your time
Beau Ramey
